

Monitoring box allowing the control and the wiring of 1 to 4 NAVILITE 48VDC beacons, operating at night only or continuously, plugged to work simultaneously or 2 in redundancy (a main light and a backup light working only in case the main light is not working) with remote

- Control 1 or 2 NAVILITE HI 113930 or 113935 either
  - with an active redundancy (one main lamp and one back-up lamp switched on in case of failure of the main lamp)
  - ✤ or a simultaneous operation of 2 lights
- Control the day/night switching of the lights through external photocensor P/N113133
- Allow remote monitoring in case of lamp failure or power supply failure by potential free contact

| Electrical Characteristics       |                               |
|----------------------------------|-------------------------------|
| Main voltage                     | 48VDC (-10%; +15%)            |
| Mechanical Characteristics       |                               |
| IP degree                        | IP65 in vertical position     |
| Dimensions                       | 160 x 58 mm                   |
| Weight                           | 300g                          |
| Cable entry diameter             | 6,5-12 mm & 4-10mm            |
| Wire cross section               | from 1 to 2,5 mm <sup>2</sup> |
| Attachment                       | 4 screws type M4              |
| Position of the 4 mounting holes | 148 x 50 mm                   |
