

Armor Rods are recommended for the protection of conductors They protect conductors against bending, compression, abrasion etc. Armor Rods fit tightly the cable shape and prevent damage issue on conductors

- Manufactured from Aluminum Alloy
- Easily hand applied
- Light weight
- Good grip on the conductor, perfectly fit the shape of the cable
- Long service life without deterioration of material properties

Table 1: Armor Rods

P/N*	Min. (mm)	Max. (mm)	Length (mm)	Nbr of Rod	Rod Dia. (mm)	Weight (kg)
113750K085	8.54	10.01	1000	10	3.07	0.214
113750K100	10.02	11.51	1000	11	3.07	0.240
113750K115	11.52	13.26	1000	13	3.07	0.280
113750K132	13.27	15.50	1000	13	3.45	0.354
113750K155	15.51	17.80	1000	15	3.45	0.409
113750K178	17.81	18.50	1000	16	3.45	0.437
113750K185	18.51	21.28	1000	14	4.24	0.580
113750K212	21.29	23.00	1000	15	4.62	0.731
113750K230	23.01	24.40	1000	15	4.62	0.997

*Final description and part number to be confirmed at order time.
*Replace X by R or L, depending on cable lay direction. Contact us for different length.

Mechanical Characteristics

Cable diameter	Ø8.54-24.40mm
