

Obstruction lighting system for high voltage lines, red fixed low intensity

The BALISOR® system comprises :

- long life cold neon discharge lamp B49 manufactured by OBSTA,
- a set of capacitive tapings in aluminium, the length depends on the voltage of the line to be protected,
- a set of flexible accessories for suspension and insulation which depends on diameter of the cable

The power supply by capacitive effect ensures a constant light intensity whatever is the value of the electric current crossing the line

Electrical Characteristics

Power source: Autonomous by capacitive effect

Mechanical Characteristics

Attachment: Aluminium clamps matching with the diameter of the cable

Photometric Characteristics

Luminous intensity: > 10 Cd

Standards

Standards compliance: ICAO Aerodrome Design Manual Part 4 chapter 14

Length of the drift depending on the voltage
